

imageconnections™ Lite

by Olan Mills

Match your database to your congregation's Olan Mills portraits.

- Now you can upload your congregation's images to your church's database.
- You can match your Olan Mills images to each church member's record.
- You can integrate and print membership records with your Olan Mills Church Directory portraits.
- Add more flexibility and functionality for your management team, and offer more ways images can be used.

Getting Started

How we use and secure your information: The information you provide is used to fulfill your specific request. We will not share, trade or sell any of your personal information to any third party or marketing company. Your personally identifiable information is kept secure. Only authorized employees (who have agreed to keep information secure and confidential) have access to this information. All emails and newsletters from this site allow you to opt out of further mailings.

Thank You For Using Image Connections Lite

No additional steps are required at this time. Once all your congregation's portrait dates are complete, Olan Mills will mail your Image Connections™ DVD to your church. Your Image Connections DVD will include the files of your congregation's directory prints. Each file is titled by the first and last name of its corresponding church member. This naming system is based on our sitting records which means that the image may not necessarily be the actual person, but an immediate family member that attended the sitting.

Please refer to your database program's instructions for uploading these images to your database.

Note: If the individual is not in your records, you may need to create a new file before you can import their image. Please refer to your database software manual for adding new members.

In some cases a few images may be for people who attend other churches in your immediate area. These households will not need to be added to your software database.
